

Floor Plan Program (Installation) Installing The Inside Tract Programs

Please install this program using the following directions

Requirements:

You must be running Windows 95, 98, Me, 2000, NT 4.0 or higher. The program requires the original CD-ROM to be in the drive in order to work. The program is designed to work on one computer, not be shared across a network. If you are running NT or Windows 2000 you must have full administrative rights and they must be assigned to the user. Your Activation Code is only good for one computer. We offer you the ability to install the program on a second computer at no additional cost. If you would like run the program on a second computer, it will require a different Activation Code. Whichever computer is running the program will need the original CD-ROM in the drive.

If you installed a previous version, we strongly recommend that you un-install it prior to installing this version (see "How do I un-install the Floor Plans program?").

Installation directions for Windows 95 and 98:

1. Click **Start** on the Task Bar ~ choose **Settings** ~ choose **Control Panel** > your Control Panel will appear.
2. Double-click on the **Add/Remove Programs** icon > your Add/Remove Programs Properties dialog box will appear.
3. With the **Install/Uninstall** tab selected, click on the **Install** button and then follow the instructions as they appear.

Your computer may need the "Windows Installer" put on your computer before installing the Floor Plan program. If this is the case, it may take a little longer to add the "Windows Installer" to your computer. You may be required to reboot your computer before it begins to install the Floor Plan program. Please be patient.

Once the "Windows Installer is in place, the directions to install the Floor Plans program should appear on the screen. Just follow the directions on the screen by clicking on the buttons "Next" and "Finish" as requested. Finally, you will be asked to restart your computer. After your computer restarts, close the Control Panel.

Installation directions for Windows Me - NT, 2000 an XP:

1. Click **Start** on the Task Bar ~ choose **Settings** ~ choose **Control Panel** > your Control Panel will appear.
2. Double-click on **the Add/Remove Programs** icon > your Add/Remove Programs Properties dialog box will appear.
3. With the **Install/Uninstall** tab selected, click on the **Install** button and then follow the instructions as they appear.
4. Follow the directions on the screen by clicking on the buttons "Next" and "Finish" as requested.
5. Finally, you will be asked to restart your computer. After your computer restarts, close the Control Panel.

Starting your Floor Plans program:

You may launch your Floor Plans program like most other programs on your computer, either by

1. Clicking **Start** ~ choose **Programs** ~ choose **Inside Tract** ~ choose **Floor Plans** or
2. Double click on the "**Floor Plans**" icon on your desktop.
